Description

The SPEC 2000EV automated dispensing system is the perfect tool for manufacturers to gain an edge in today's competitive marketplace. The system not only precisely controls the dispensing of ingredients to provide excellent formula repeatability from batch to batch, but also serve as a complete inventory management system.

Technical specification

Key Benefits:

- Improved productivity associated with fast, fully automatic dispensing
- Reduction in finished inventory using a computer to reformulate obsolete or returned finished materials
- Cleaner and safer work environment is accomplished by spillage reduction
- Reduction of waste associated with spillage, weighing inaccuracy, over production and evaporation

SPEC Iblend Management Software:

SPEC iBlend Management System software is the most comprehensive dispensing system software available. The software is written for Windows PC's and is available for use with VB or SOL databases. The software is designed for ease of use with a mouse for point-and-click operation and provides complete inventory management and production reporting functions. in addition to automated dispensing.

The software is divided into several main categories including:

- File Maintenance (for input of raw materials, customers, VOC's, etc.)
- Formula Maintenance (for input and editing of formulas)
- Production Control (for all production related functions such as dispensing, toning, returns, etc.)
- Inventory Control (for all functions relating to raw material inventory, container levels, physical inventory, etc.)
- Reports (to view or print any one of over 60 inventory, productions, and costing reports available on the system)
